“A customer is the most important visitor on our premises, he is not dependent on us. We are dependent on him.

He is not an interruption in our work. He is the purpose of it. He is not an outsider in our business. He is part of it.

We are not doing him a favour by serving him. He is doing us a favour by giving us an opportunity to do so.”

- Mahatma Gandhi

In a newly developing society like India, ownership and control of the financial sector in the hands of the people is important and necessary. Financial institutions are an important tool in the hands of society for the fulfilment of social and economic objectives.

It has been decided to nationalize major banks for the sole purpose of utilizing public savings for the development of the productive sector, as well as to bring public control over public deposit-collecting banks.

The Government is confident that the decision to nationalize banks will achieve the objective of collecting public savings and investing it effectively and achieving rapid national economic development.

- Indira Gandhi

FOREWORD

Banking Education Training & Research Academy is bringing out publication on Banking Statistics 2022 to 2026 covering Data on all important parameters so as to have an overview of the journey of Bank for the period 2022 to 2026. .

This data reveals a clear trend: while both Public Sector Banks (PSBs) and Private Sector Banks (PVBs) have grown substantially, private banks have grown faster in almost every major parameter. As a consequence, the market share of PSBs in deposits, advances and total business has gradually declined.

1. Business Growth: PSBs market share is still larger, but are losing it.

Total Business (Deposits + Advances)

Year	PSBs (₹ Crore)	Private Banks (₹ Crore)	PSB Share	Private Share
2022	1,85,49,110	98,61,970	65.3%	34.7%
2026	2,89,09,594	1,81,31,271	61.5%	38.5%

Between 2022 and 2026: PSB business increased by about 55.9%. Private bank business increased by about 83.9%. PSB market share declined from 65.3% to 61.5%. Loss of market share: approximately 3.8 percentage points.

2. Deposits: Private Banks are growing faster

Deposits

Year	PSBs (₹ Crore)	Private Banks (₹ Crore)
2022	1,09,50,496	52,31,297
2026	1,59,22,759	91,80,940

Growth: PSBs: about 45.4%. Private Banks: about 75.5%. Private banks are attracting deposits faster through: aggressive marketing, digital platforms, relationship banking, wealth management products, premium customer acquisition strategies.

3. Advances: Private Banks Expanding Aggressively

Advances

Year	PSBs (₹ Crore)	Private Banks (₹ Crore)
2022	75,98,613	46,30,673
2026	1,29,86,835	89,50,330

Growth: PSBs: 70.9%. Private Banks: 93.3% Private banks have aggressively expanded: retail loans, housing finance, personal loans, vehicle finances credit, digital lending PSBs continue to carry significant social obligations and priority sector responsibilities.

4. Branch Expansion: A Major Factor

Branch Network

Year	PSBs	Private Banks
2022	86,247	32,224
2026	90,601	42,760

Growth: PSBs: 5.05%. Private Banks: 32.7% Private banks added over 10,500 branches during the period. PSBs added only about 4,350 branches. This is perhaps the single biggest reason behind market share migration. Business follows presence. Where branches open, deposits and loans follow.

5. Human Resources: The Most Critical Difference

Staff Strength

Year	PSBs	Private Banks
2022	7,94,109	6,31,039
2026	7,90,178	8,30,064

Growth: PSBs: virtually stagnant. Private Banks: increase of about 31.5%. Private banks now employ more people than PSBs. PSBs witnessed: retirements, inadequate, recruitment, outsourcing, contractualization, increasing workload per employee. Private banks followed the opposite strategy: large recruitment drives, sales teams, relationship managers, technology specialists, marketing personnel. Business expansion naturally followed.

6. Profitability

Net Profit (2026)

Category	Net Profit (₹ Crore)
PSBs	2,07,723
Private Banks	1,87,278

PSBs continue to generate higher aggregate profits. However, private banks generate these profits with a much smaller balance sheet. This indicates: higher margins, superior fee income, better cross-selling, higher productivity in many segments.

7. Asset Quality

Gross NPA (2026)

Category	Gross NPA (₹ Crore)
PSBs	2,51,662
Private Banks	1,21,507

Net NPA (2026)

Category	Net NPA (₹ Crore)
PSBs	48,936
Private Banks	33,667

8. Is Government Policy Responsible?

There is considerable evidence that the policy framework indirectly favors private banks.

A. Recruitment Restrictions in PSBs

Governments bureaucratic approach results in delayed approvals, manpower rationalization, recruitment controls, cost-cutting pressures. Private banks recruit according to business requirements.

B. Capital Constraints

PSBs are expected to undertake various government jobs & carry out social banking for which they are never compensated but when it comes to infusion of the capital government expects PSBs either to generate the profits & augment reserves or approach the market. Thus PSBs are driven to privatization. Private banks can access capital markets more freely.

C. Expansion Philosophy

Private Banks: Growth-oriented, Market-share focused, Sales driven

PSBs: Risk conscious Compliance driven Government programme oriented

D. Public Service Obligations

PSBs undertake: Jan Dhan, PMJJBY, PMSBY, DBT, Pension payments, Rural banking, Financial inclusion.

Private banks participate but not to the same extent. Thus, comparisons are not always on a level playing field.

9. Why Private Banks Are Growing Faster?

The data indicates four reasons:

1. More Branches

Private bank branch growth: 32.7% PSB branch growth: 5.0%

2. More Employees

Private bank staff growth: 31.5%, PSB staff: Almost stagnant.

3. Higher Operating Expenditure

Private banks invest aggressively in: technology, marketing, customer acquisition, analytics, digital channels. They spend more and therefore earn more.

4. Faster Decision Making

Private banks:

launch products faster, approve loans faster, recruit faster, expand faster.

10. The Central Question

The data suggests that the decline in PSB market share is not because PSBs are weak. In fact: Profits are at record levels. NPAs are at historic lows.

Capital position is stronger. Deposits and advances continue to grow. The real issue appears to be growth strategy and policy environment.

When:

private banks increase branches by over 32%, increase staff by over 31%, invest heavily in technology and marketing, while PSB staff remains almost stagnant, recruitment lags retirements, branch expansion is modest, then loss of market share becomes inevitable.

The 2022–2026 data presents a paradox.

Public Sector Banks are financially stronger than they have been in many years, yet they are steadily losing market share to private banks.

The evidence indicates that the primary drivers are:

1. Slower branch expansion.

2. Inadequate recruitment.

3. Conservative growth strategy.

4. Public service obligations.

5. Policy framework that provides greater operational flexibility to private banks.

If the Government genuinely wishes to maintain a strong public sector banking system, it must move beyond celebrating profits and focus on:

large-scale recruitment of officers, clerks and sub-staff, accelerated branch expansion, technological investments, greater managerial autonomy, level-playing-field competition. Otherwise, PSBs may remain profitable but gradually surrender a larger share of India's banking business to the private sector.

The owner i.e. the government should have will & determination to strengthen public sector banks which play an important role in strengthening the economy & public good but if the government yields to the pressures of IMF & world bank then the present trend to weaken public sector banks will continue which is not in the interest of common man & nation too!

Devidas Tuljapurkar
Chairman
